Welcome Message from the President

Dear colleagues,

On behalf of the Board of Directors of the Chinese Language Teachers Association, USA (CLTA), I warmly welcome colleagues from around the world to gather under the Gateway Arch by the Mississippi River on this beautiful spring day. Together, let us explore issues of our common interest, and join our efforts in promoting the development of international Chinese education.

Since its establishment over sixty years ago, this is the first time that CLTA is holding its annual conference in St. Louis, Missouri. We are honored to welcome over four hundred experts and scholars to this event, setting a new attendance record. We have accepted a total of 255 paper proposals. Our program includes 3 keynote speeches, 5 invited colloquia and workshops, 15 roundtable sessions, and 80 panel presentations. We look forward to scholars and teachers engaging in academic discussions, reviewing the latest developments in our field, and fostering collaborative relationships throughout the three-day conference.

We are happy to announce that this year's conference boasts a number of new features. There is a significant presence of experts and scholars from abroad, which will undoubtedly infuse new vitality into the conference. Additionally, we have introduced new formats for the conference agenda, including the roundtable discussions and invited colloquia.

We sincerely thank the CLTA Board of Directors and all colleagues of the CLTA Conference Committee for their tireless efforts and hard work in ensuring the success of this conference. Once again, we welcome you all to the 2024 CLTA Annual Conference, which I hope will broaden our horizons, enrich our knowledge, give us new inspirations and joint plan for development!

Best regards,

Xia Liang

President, Chinese Language Teachers Association, USA

On behalf of the CLTA Board of Directors and the CLTA Conference Committee

2024年会会长欢迎辞

各位同事：

首先，我谨代表美国中文教师学会理事会并以我个人的名义，热烈欢迎来自世界各地的同仁们在此春暖花开之际齐聚密西西比河畔大拱门下，一起探讨国际中文教育领域大家共同关心的话题，并齐心努力推动国际中文教育事业的发展。

美国中文教师学会自创建六十余年来，第一次在密苏里州圣路易斯市举办年会，我们创纪录地迎来了四百多位本领域的专家学者共襄盛举，实乃荣幸。此次会议我们共收到稿件255篇，共安排了3个主旨发言，80个小组发言，15个圆桌讨论，以及5个特邀论坛与工作坊。我们期待老师们在三天的会议当中能够切磋学术，把握行业的最新发展动态，发展合作关系，共同促进整个中文教学领域学术共同体的发展与完善。

今年年会有几个新的亮点，比如我们有大量来自国外的专家学者参会，这必将为会议注入新的活力；另外此次会议增加了一些新的方式，比如圆桌讨论、特约论坛等等。

我们衷心感谢美国中文教师学会理事会、年会会务组的各位同仁为此次会议成功举办付出的不懈努力和辛勤汗水。再次欢迎大家前来参会并预祝大会开成一个业内同仁开拓思路、丰富知识、互相激励、共谋发展的大会。

祝各位老师参会愉快！

梁霞
美国中文教师学会会长

Keynote Speeches

生正逢时——五十年来美国中文教学的反思

周质平

普林斯顿大学东亚系

中国人常说“生不逢时”，但对从事国际中文教学的人而言，当今却是个“生正逢时”的时代！

对中国人来说，教外国人学中文成为一门学科，一种职业是上世纪80年代后期才逐渐形成规模的。这在中国近现代教学史上是个新生事物。鸦片战争之后，从晚清的洋务运动到民国早期的新文化运动，以至于1949年之后的中华人民共和国，至少头30年的时间都只有中国人学外语的份儿，且不论是英语，日语还是俄语，很少听说有外国人学习中文的事。本文拟就过去50年来，中文教学在美国的发展，作些回顾和检讨，尤其着重在师资养成，教学方法和文化处理这三点上。

在师资的培养上，应以中国文史和汉语本体的知识为体，教学法为用，当前国内外有些高校对外汉语研究生的课程安排，常有本末倒置的现象。

在教学方法上，过分重视流利而忽略准确，在所谓“完成任务”或“达成交流”这两个指导思想之下，强调语言的功能，而忽略语言的结构。

自从有了所谓“跨文化交际”这一课题之后，许多交际上的困难都归咎于文化处理的失当，而不知真正的问题是语言水平太低，根本不足以达成交流的目的。

日本中文学习者的偏误特色及教学对策

Error of Japanese Chinese learners and their teaching strategies

古川裕 Yutaka Furukawa

亚太地区国际汉语教学学会，Osaka University

When teaching Chinese in Japan, both in and out of class, we often encounter various errors produced by Japanese studies, including output (speaking, writing, translating) and input (listening, reading, translating). Although the errors occur so frequently and so widely, we think that so far, the research on errors of native Japanese speakers has not attracted enough attention. At the same time, we should also admit that there are still many problems in the current Chinese teaching grammar system at home and abroad that cannot meet the needs of foreign Chinese teaching. How to revise and improve the current Chinese teaching grammar system and apply it to teaching practice reasonably and effectively is undoubtedly one of the goals that the foreign Chinese teaching community needs to make efforts for.

Keynote Speeches

Previous studies on non-native speakers' biases often use classification to explain the problem, such as "positional errors", "mixing", "misuse", "redundancy", "absence" and so on. However, we believe that no matter how detailed the classification is, it has no application value in teaching. We believe that this classification is just a division of the bias results from the perspective of native speakers of Chinese, without revealing the causes of bias. For TCFL, the latter is of great significance. Because from the perspective of non-native speakers, rather than telling them what kind of bias they have, they want to know the causes of their biases, because only by knowing the causes can they prevent them. What we need to explain is "why".

According to the preliminary survey conducted by the Chinese majors in the School of Foreign Languages of Osaka University, the reasons for bias can be roughly divided into the following four categories:

1. Negative transfer of Japanese = interference of mother tongue (including the negative impact of Chinese characters)
2. Negative transfer of English = interference of foreign languages
3. Negative transfer of Chinese = interference of Chinese itself
4. Insufficient explanation = responsibility of Chinese teachers

汉语环境中打工 (Working in a Chinese Language Environment)

Robert Hegel

Washington University, St.Louis

As an average language learner, I was slow in developing conversational skills. During my student years there were fewer opportunities to learn than there are now; nearly all learning was confined to the classroom. Based on my own experience I conclude that developing advanced level language skills can best be accomplished outside of class. I recommend directing the most serious students of Chinese language and culture to plan on spending extended periods of time using Chinese as their primary language of communication, living and working in Chinese language. Finding the right working environment there can be the key to real fluency in Chinese.

Invited Workshops & Colloquia

Invited workshops

Friday, 4/5, 07:00 pm - 09:00 pm, Landmark 5

Using AI tools for Chinese language teaching and research

Wei Cai, University of Calgary

Jun Da, Middle Tennessee State University

This workshop covers two topics on the use of AI tools for Chinese language teaching and research: 1) How to compose impactful ChatGPT prompts to develop a spectrum of learning and teaching materials, such as lesson plans, reading materials, and practice activities, among others, and the best practices in refining and optimizing these materials to maximize learning outcomes; 2) Possible applications of AI tools such as ChatGPT, Claude, and Ernie Bot (文心一言) and best practices to support SLA research and publication, including literature exploration, data analysis, the drafting and editing of scholarly manuscript, and ethical considerations.

Friday, 4/5, 07:00 pm - 09:00 pm, Landmark 6

Language Program Evaluation: An Evidence-Based Process for Understanding and Improving Your Program

Meg Montee, Georgetown University

Language program evaluation is a powerful process that allows educators to ask and answer questions about their programs through steps that include asking evaluation questions, gathering and analyzing data, and making evidence-based decisions and improvements to their programs. However, recent research has shown that educators may not fully understand the purposes and uses of language program evaluation (Malone, Stevens, and Pineault, forthcoming). When empowered with a clear understanding of what program evaluation is and how it can be used in their contexts, educators are then equipped to advocate for and make changes to their programs.

This two-hour, hands-on workshop will provide participants with an understanding of the major steps involved in language program evaluation, including planning, developing evaluation questions, identifying stakeholders, collecting and analyzing data, reporting results, and implementing changes. Through scenarios and discussion, participants will engage with key ideas in the workshop and synthesize new information. Additionally, the workshop will include practice with several key data collection methods in language program evaluation, including surveys and interviews.

Participants will apply concepts from the course to their own contexts by developing their own evaluation questions and identifying stakeholders. Thus, the workshop will have practical and immediate applications for participants who are interested in conducting their own program evaluations or who want to advocate for this process in their contexts.

Invited Workshops & Colloquia

To summarize the key goals of the session, by the end of the workshop, participants will be able to:

1. Gain foundational knowledge about the purposes and uses of program evaluation;
2. Learn about methods for collecting data about the effectiveness of language programs; and
3. Consider next steps for language program evaluations in their own contexts.

Invited Colloquium

Saturday, 4/6, 9:00-9:50 am, Landmark 6

Seeking Changes in a Challenging Time: New Perspectives for Proficiency-Oriented Chinese

Teaching and Beyond

Yu Liu, Brigham Young University

Qiaona Yu, Wake Forest University

Yuyun Lei, Western Kentucky University

Yu Wu, University of Rhode Island

Yang Wang, Brown University

Wei Wang, University of Houston

Ziyi Geng, Wake Forest University

Luoyi Cai, University of North Carolina at Chapel Hill

Language education faces increased challenges due to the convenience of translation tools, seemingly ubiquitous English speaking, and declining college enrollment (Bauman, 2021; Johnson, 2019). Language educators have actively sought strategies to navigate challenges that demand innovation and adaptability. One of such strategies is proficiency-oriented language instruction, which refines the existing teaching practices and serves as a comprehensive framework for organizing teaching, curriculum, and evaluation. This colloquium will present empirical studies on proficiency-oriented language instruction, program design, and assessment.

The first study, *Bridging the Gap: Aligning Curriculum Design with Proficiency Levels in a Chinese Language Program*, aligns program design with students' proficiency levels measured by OPI and HSK scores. The demonstrated benchmarks encourage diverse pathways for Chinese language programs to enhance students' proficiency development. The demonstrated benchmarks encourage diverse pathways for Chinese language programs to enhance students' proficiency development.

To explore such pathways, the second study, *A UDL Blended Curriculum Metamodel (BCM) for Proficiency-Based Chinese Instruction*, introduces an innovative Universal Design for Learning (UDL) approach. This metamodel allows varied composition and weight of in-person and online teaching modalities to support

Invited Workshops & Colloquia

proficiency progress from novice- to advanced-level in a first- to fourth-year proficiency-oriented curriculum.

Since listening has been a source of frustration for L2 learners, the third study, *What Makes a Good L2 Listener? Factors Contributing to Varied Performance in Proficiency-based Chinese Listening Comprehension*, identifies factors such as oral proficiency and vocabulary size as pivotal in predicting listening comprehension, whereas testing anxiety and listening strategies play less important roles.

To develop listening skills in the classroom setting, the fourth study, *How to Be an Active Listener: Teaching and Assessing Listener Responses in L2 Chinese*, evaluates the effectiveness of teaching and assessing Listener Response (LR), using longitudinal data from interactions between L2 Chinese learners and native speakers. By conducting conversation analysis of beginning-level Chinese learners, the study uncovers distinct levels of LR development, resulting in specific descriptors for each level.

The fifth study, *Fostering Language and Intercultural Learning through a Cross-Institutional Community-Engaged Project*, extends the scope of proficiency-oriented instruction into intercultural competence (IC) development. This project involves collaborative activities initiated by two universities, aiming to assess learners' IC improvement by analyzing their language use, perspectives, and interactions. Enhancements in IC were evident in interactions with community partners and the presentation of cultural perspectives.

Invited Colloquium

Saturday, 4/6, 01:45-02:35 pm, Landmark 6

Examining the Utilization of Chinese Proficiency Grading Standards in Chinese Language Education in the US and UK Contexts

Ye Tian, University of Pennsylvania

Jie Zhang, University of Oklahoma

Xiaoming Hou, Bucknell University

Zhu Zhu, University of Aberdeen

Bo Liu, The University of Texas at Austin

Maiheng Dietrich, University of Pennsylvania

Grace Wu, University of Pennsylvania

This colloquium presents four studies that examine the utilization and application of the Chinese Proficiency Grading Standards for International Chinese Language Education (Grading Standards) (《国际中文教育中文水平等级标准》) that focus on grammar, characters, vocabulary, and translation, respectively.

Invited Workshops & Colloquia

The first study utilized the Grading Standards to examine the coverage, level distribution, type distribution, and presentation methods of grammar instruction in the beginning to intermediate-level textbook Integrated Chinese (《中文听说读写》) and several advanced-level Chinese textbooks.

The second study conducted statistical research on the characters and vocabulary used in three sets of textbooks. It revealed that the vocabulary quantity specified in the Grading Standards is significantly higher than the vocabulary taught in these eight courses, and there is a clear mixture of vocabulary levels in these textbooks.

The third research project involved the development and implementation of a character recognition test based on the Grading Standards. The results provided an estimation of the learners' character recognition proficiency and reveal variations at multiple levels, including school, course, and individual levels. On the other hand, they served as a valuable link between the Grading Standards and teaching/learning practices, enabling necessary reflections on the efficacy of the Grading Standards, particularly concerning the character component.

The fourth paper raised questions concerning the descriptions and objectives pertaining to the “Translation” ability. It embarks on a conceptual exploration aimed at characterizing and elucidating the abilities of L2 Chinese learners in translation across varying proficiency levels.

In conclusion, these four studies collectively shed light on various facets of the Grading Standards for international Chinese language education with regard to how it can be integrated into Chinese language teaching in the US and UK, offering valuable insights into grammar instruction, vocabulary, and character usage, character recognition testing, and the nuanced considerations surrounding the inclusion of translation ability, and providing a comprehensive exploration of the Grading Standards' implications for Chinese language education in both academic and practical contexts.

Invited Colloquium

Saturday, 4/6, 02:45-03:35 pm, Landmark 1,2,3, &4

A Survey of College-Level Chinese Language Programs in the US

Shuai Li, Georgia State University

Xia Liang, Washington University in St. Louis

Jun Da, Middle Tennessee State University

Zhongqi Shi, Columbia University

Yu Wu, University of Rhode Island

Invited Workshops & Colloquia

The landscape of college-level Chinese language education in the US has undergone significant changes in recent years, prompting a heightened sense of urgency among practitioners to seek solutions. However, due to the last national survey on tertiary-level Chinese programs being conducted over a decade ago (Li, Wen & Xiao, 2014), there is currently limited up-to-date data available for gaining a panoramic view of the field's status quo.

Commissioned by the current CLTA Board, the present study represents a timely effort to address the aforementioned issue by conducting a large-scale survey among Chinese language programs in American universities and colleges. Informed by previous surveys, the research team developed a survey consisting of over 70 questions covering areas such as curriculum, instructors and students, teaching materials, pedagogy, assessment, study abroad, and technology. Additionally, we plan to conduct follow-up interviews with selected programs to gain in-depth insights into their respective situations. We plan to report preliminary survey findings based on the responses from 193 Chinese language programs.

02:30pm - 03:20pm (4/5, Friday)

Roundtable discussions are designed for in-depth interactions. Each roundtable session starts with one or two (groups of) presenters sharing their work consecutively for 10 minutes each around a table. The next 30 minutes are used for all the presenters and attendees to engage in a group discussion. Please note that no projector is available. Presenters are encouraged to prepare handouts (10 copies suggested) to better engage attendees sitting around a table with them.

ADDITIONAL INFORMATION

**FORMERLY JOURNAL OF THE CHINESE LANGUAGE
TEACHERS ASSOCIATION**

SINCE 1966

PUBLISHED BY JOHN BENJAMINS

Chinese as a Second Language (CSL) publishes **peer-reviewed** original articles in English or Chinese that make a significant contribution to the theory and practice of Chinese as a second language. Articles in all areas of Chinese pedagogy and acquisition and in related areas such as Chinese program management, curriculum design, and teaching Chinese culture and literature in Chinese language classrooms are welcome. In addition to research articles, *CSL* also publishes book reviews and short contributions that report on new discoveries and developments in the field of Chinese as a second language.

CLTA AWARDS

NEWLY ESTABLISHED

Shou-hsin Teng Pedagogical Innovation Prize

鄧守信

In recognition of Prof. Shou-hsin Teng's achievements and contributions to Chinese linguistics and L2 pedagogy, the Cheng & Tsui publishing company established this prize to be awarded through CLTA.

The objective of this prize is to promote pedagogical innovations that effectively and creatively engage in various aspects of Chinese language education, such as grammar, phonetics, pragmatics, in a Chinese language classroom. In accordance with Prof. Teng's wishes, the Teng Prize supports Junior faculty of Chinese in the U.S. in conducting pedagogical research projects and presenting their findings at the CLTA Annual Conference. Each year during the Teng Prize period, one recipient (either an individual or collaborative effort) will be selected and awarded a certificate and a prize of \$1200.

THE JIEDE EMPIRICAL RESEARCH GRANT FOR CHINESE PEDAGOGY/ CHINESE APPLIED LINGUISTICS

The grant of \$2,000 will support empirical research in Chinese pedagogy and applied linguistics that contributes to building a sound understanding of teaching and learning Chinese as a Foreign Language. Except for university tenured professors, applications from all teaching professions and graduate students who conduct empirical research in the Chinese language are welcome to apply. The recipient will be expected to present a paper at CLTA's annual meeting of or to submit a progress report at the end of the grant term.

ACTION RESEARCH AWARD

The Action Research Award will provide up to \$500 to a CLTA member conducting action research to improve classroom teaching practice. In 2023, a new category has been introduced to the award, targeting action research that promotes program connection, collaboration and development. Each category will have one recipient. Recipients are expected to present at the CLTA annual meeting or to submit a progress report at the end of the funding period. Award funds may be used for purchasing supplies and teaching tools needed for the research or for presenting research results at the CLTA conference.

TAO-CHUNG TED YAO MEMORIAL AWARD

This award is sponsored by the Tao-chung Ted Yao Memorial Fund, which was established by the CLTA with support from Prof. Yao's wife, Mrs. Kuang-tien Chang Yao. Following Prof. Yao's wish, the award supports graduate students in the U.S. to present papers independently at conferences sponsored or organized by the CLTA. For each year during the Yao Fund period, two to three recipients of Yao Award will be selected. Each recipient receives a certificate and an award up to \$850 to defray conference expenses.

姚道中 (1946–2015)

Cheng & Tsui Professional Development Award

This award is to support the attendance of pre-collegiate and collegiate teachers at training workshops, seminars, conferences, and other in-service learning experiences at the local, national, or international level and/or to collaborate with a mentor teacher.

BLCUP Teaching Award BLCUP Award for K-12 Professional Development

The first award is to encourage CLTA members to contribute to the improvement of Chinese Language education in the U.S. through the design, development, and application of new pedagogy, innovative classroom practices, and teaching tools. The second award is to support K-12 instructors to engage in professional development activities by presenting at the CLTA-US annual conference.

CULTR Travel Grant for First-Time Conference Attendees

This award is sponsored by the Center for Urban Language Teaching and Research at Georgia State University. It will provide an annual prize amount of \$900 to support three first-time CLTA conference attendees who are in year 1-5 of teaching. This award is open to all K-12 and college-level teachers who are CLTA members.

TOCFL & ACTFL 對應研究計畫 招募受試者

Participants Wanted for Research Plan of Aligning TOCFL and ACTFL

為取得實徵研究資料，從多面向建立 TOCFL 與 ACTFL 的對應關係，以利於北美地區華語學習者瞭解 TOCFL 測驗分數所代表的意涵。本次計畫誠摯邀請有意願的受試者參加 TOCFL 和 STAMP 4S。受試者無須支付測驗費用，並將於測驗結束後，取得成績單和華測禮品。

To obtain the empirical evidence and establish the correlation between TOCFL and ACTFL from multiple perspectives for the Chinese learners in North America to realize the meaning of TOCFL scores, the research plan sincerely invites the volunteers to take TOCFL and STAMP 4S. The plan does not charge the volunteers any test fees. The volunteers may receive score reports and TOCFL gift after finishing the test.

FBI LINGUISTICS: An Inside Look

Knowledge of foreign languages and cultures is a significant asset to the Federal Bureau of Investigation (FBI). Linguists provide valuable intelligence about criminal and terrorist activity on American soil that could potentially damage national security and risk American lives. Their unique talents also help to identify and prevent foreign counterintelligence threats, cases of corruption, espionage, cyber crime, human trafficking and other offenses.

Generally, FBI Linguists begin their careers as Contract Linguists; the agency may invite the best Contract Linguists to join as full-time Language Analysts.

More than Just Words

FBI Linguists' duties can include:

- » Translating written or audio materials, normally from a foreign language into English.
- » Interpreting during a crucial interview of a subject of an investigation or a visit from a foreign dignitary.
- » Providing cultural expertise relating to any matter over which the FBI has jurisdiction

Linguists also may testify at trials, help interview suspects, victims and witnesses and occasionally accompany Special Agents on searches or arrests. Contract Linguists are required to work on-site, but may be asked to travel on a temporary duty assignment, such as serving as an interpreter at an overseas training session.

The FBI has Contract Linguist opportunities in many major U.S. metropolitan areas, as well as with the National Virtual Translation Center (NVTCL). Applicants can choose to work with either organizations.

Professional Proficiency Required

Successful candidates must exhibit proficiency in English and pass the required components of the FBI's Foreign Language Test Battery. The FBI looks for candidates with skill levels who score in the general professional proficiency range according to the Interagency Language Roundtable (ILR) scale (www.govitlr.org).

There are no official study guides for the series of tests. To prepare for the translation portion of the test, you may wish to read newspapers written in the foreign language and practice translating them into English. Watching foreign language news programs may also be useful.

OUR core VALUES:

- Rigorous Obedience to the Constitution
- Respect
- Compassion
- Fairness
- Integrity
- Accountability
- Leadership
- Diversity

We seek those fluent in Arabic, Chinese, Farsi, Korean, Russian, Spanish, Urdu or Vietnamese among many others.

Becoming an FBI Linguist Takes Dedication

The role of an FBI Linguist is a demanding and rewarding job and requires stringent entry qualifications. Those who complete the process become part of an elite team that keeps our country safe.

Minimum Qualifications

All FBI Linguists and Language Analysts begin as Contract Linguists.* To apply, you must:

- » Be at least 18 years old.
- » Be a U.S. citizen. If you have dual citizenship, it is not a requirement that you renounce it, but you must be willing to renounce if asked.
- » Have lived in the United States for three of the last five years, unless employed outside of the country by the federal government.
- » Be able to obtain a Top-Secret Clearance.
- » Be willing to undergo a language proficiency test battery, polygraph and comprehensive background investigation.
- » Be available to work on-site at least 20 hours a week and perform work as mutually agreed upon with the local FBI office.

Automatic Disqualifiers

- » Non-U.S. citizenship.
- » Conviction of a felony.
- » Violation of the FBI Employment Drug Policy.
- » Default on a student loan insured by the U.S. government.
- » Failure to register with the Selective Service System (males only).
- » Knowingly or willfully engaged in acts or activities designed to overthrow the U.S. government by force.
- » Failure to file income tax returns.

*Contract Linguists are considered self-employed and are not eligible to receive government benefits. They earn an hourly rate as determined by their language proficiency levels, specialized experience and the need for their languages in current FBI initiatives. Hourly rates range from \$29 to \$41.

Applicant Process

If you're inspired by our mission and eager to start a career like no other, here's what you need to know about the application process:

- STEP 1** **INFORM & APPLY**
Visit the Language Talent Network at FBIJobs.gov.
- STEP 2** **TESTING**
If selected, complete required language testing.
- STEP 3** **BACKGROUND INVESTIGATION**
If qualified, you will undergo an intensive background investigation, including:
 - » Polygraph examination.
 - » Credit and records checks.
 - » Interviews with former and current colleagues, neighbors, friends, etc.
 Be aware that the background investigation process can take a year or more.
- STEP 4** **BASIC ORDERING AGREEMENT (BOA) & WORK ORDER**
If approved, sign the BOA and work order.

Foreign Language Test Battery: What You Need to Know

The FBI's Foreign Language Test Battery consists of listening, reading, translating and speaking tests:

Listening Comprehension Test
Hear foreign language conversations and answer multiple-choice or short-answer questions in English. For some languages, you may be asked to write a summary of the conversation in English.

Translation Test Translate short passages in the language fully and faithfully into English, communicating everything in the original passage. The test is scored for accuracy of content and quality of expression.

Speaking Tests After passing the written tests, you will take speaking tests in the foreign language and English. These tests consist of a structured conversation conducted via phone with native speakers of the test language.

Reading Comprehension Test
Answer multiple-choice questions in English about the content of short passages written in the foreign language.

English Composition Test
Required if a translation test is unavailable; involves writing an essay on a given topic. For both translations and compositions, you are allowed to use a non-electronic dictionary.
